***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species:

(A) the species of the device being comprised of particular and distinct details of the structure (an embodiment corresponding to Figures 24A-24B comprising claims 1-6);

(B) the species of the device being comprised of particular and distinct details of the structure (an embodiment corresponding to Figures 14A-14B comprising claims 21-23).

The species are independent or distinct because there is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Newly submitted claims 1-6 directed to an invention that is independent or distinct from the invention originally claimed (an embodiment corresponding to Figures 14A-14B) for the following reasons: these comprise particular and distinct details of the structure (an embodiment corresponding to Figures 24A-24B)

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1-6 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al (US 5473450)

Yamada discloses a liquid crystal display (LCD) device comprising (see at least Figures 10A-10B): two substrates; a liquid crystal layer into which liquid crystal is inserted between opposing surfaces of the two substrates; a structure (e.g., 8) its entire gap thickness equal to a cell gap across the liquid crystal layer, the structure partitioning the liquid crystal layer and enclosing a part of the liquid crystals to form at least one domain in each display pixel.

Yamada discloses the LCD device comprising the liquid crystal molecules having negative dielectric constant anisotropy (see at least col. 84, lines 31-32) and almost vertically aligned with respect to the substrate surface while no voltage is applied (see at least Figures 11A, 12A).

***Response to Arguments***

3. Applicant's arguments with respect to claims 21-23 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
